1. The following is an examiner's statement of reasons for allowance: applicants' amendment has clarified the process in the independent claims, as well as providing for treatment of the interior of tubular substrates of specific dimensions, which applicants correctly note are not covered for the process for the claims as written.

Applicants' terminal disclaimer over PN 6,932,664 B2 has been approved, hence removing the obviousness double patenting rejection made thereover.

Update and further search did not find a reference or references, which repair this defect by itself or in combination with references as previously applied. Patents to Seuter et al. (4,544,997), Addiego et al. (5,260,241) & Arai et al. (4,988,661) provide for coating tubular substrates including interiors with metal oxide materials, but all of the tubes discussed therein are of significantly greater diameters than presently claimed tubes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
